VESDA-E Backward Compatibility Table

September 2019

VESDA-E detectors have been designed to be backward compatible with legacy VESDA devices. When applying VE series detectors to existing VESDAnet networks please ensure the other devices on the network are upgraded to the Firmware Version indicated below:

Device Type	Firmware Version
VLI	3.26.08
VLP	3.17.00
VLS	3.21.00
VLC	3.13.00
VLC E700R	3.10.50
VLF	3.12.00
VESDA Display	3.13.00
VLS Display	3.13.00
Remote Relay	3.13.00
System Relay Module	4.01.00
Modbus V3 HLI	3.42.00
Access HLI	3.21.00
Sliding Windows HLI	3.06.00
Programmer *	3.11.01

* Programmer only supports VESDA-E devices in Mimic Mode.
